Dr Tim Wigmore,  
Consultant Anaesthetist  
& Intensivist

**Free direct  
delivery the same  
day or overnight\***

## Secretary Supported

Administrator access reduces workload for practitioners. mPrescribe® facilitates patient entry, status monitoring and preparation of prescriptions for mobile authorisation.

## Medication Range

Due to the range of specialists supported, Pharmaciege stocks and sources medication not typically found outside hospital, including refrigerated, controlled, injectable and biologic medication.

## Clinical Governance

Co-founded and co-owned by leading private clinicians, our secure and encrypted technology is compliant with all GPhC, GDPR and e-Prescribing regulations.

## Excellence in Pharmacy Services

We've supported thousands of clinicians with their private prescription delivery needs since 2008. Led by a multidisciplinary team and advisors who bring together decades of clinical, pharmacy, healthcare and technical expertise - including from Google, Babylon Health, HCA and The Doctors Laboratory.

## Courier Delivery

We offer free same day delivery to London postcodes, or next weekday nationally as standard. Same-day deliveries outside of London postcodes carry a fee. International deliveries are also available. Patients receive either a phone call, an SMS or an email with a link to pay securely.

## About Pharmaciege

We receive private e-Prescriptions from clinicians, then hand deliver medication to their patients rapidly, reliably and stress-free.

Built on a belief that we should look after our patients as we would our own family, Pharmaciege makes this level of care attainable by everyone who relies on private medicine. For more than 50 years, its family owners have pioneered excellence in pharmacy services. Now co-owned by its team and leading clinicians, Pharmaciege's service and technology are recommended by private practices throughout the UK.
