

Create or repeat private prescriptions for direct delivery

e-Prescribing via our mPrescribe® app allows you to prescribe flexibly with or without a laptop, for same weekday or next weekday delivery to your patients nationwide.

GP and Consultant reviews

"Consistent, efficient, friendly and responsive to both the needs of our practice and more importantly, to our patients."

Dr Tim Ladbrooke
Private GP

"Fantastic service. Makes prescribing very easy. My patients are really impressed too. I highly recommend Pharmaciege."

Dr Lucinda Green
Consultant Psychiatrist

e-Prescribing via our mPrescribe[®] app

With the **mPrescribe[®] app**, clinician users electronically authorise and transfer e-prescriptions securely to our pharmacy, from where we dispense and deliver them to wherever patients request.

Secretary supported

Administrator access reduces workload for practitioners. mPrescribe[®] facilitates patient entry, status monitoring and preparation of prescriptions for mobile authorisation.

Medication range

Due to the range of specialists we support, we stock and source medication not typically found outside of a hospital setting, including refrigerated, controlled, injectable and biologic medication.

Clinical governance

Co-founded and co-owned by 85 leading private clinicians, our secure and encrypted technology is compliant with all GPhC, GDPR and e-Prescribing regulations.

Authorise imported prescriptions via the mPrescribe[®] app

We have updated the app to include a simple 'import' functionality, where a secretary or clinician can export an email or upload a prescription from any practice system (EHR).

Courier delivery

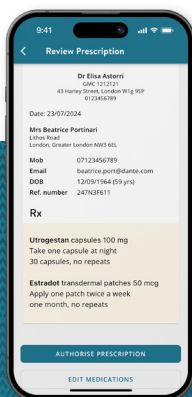

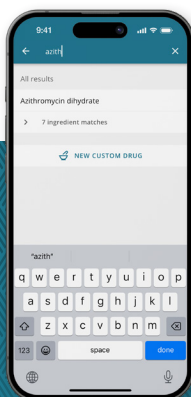

We include same weekday delivery to London postcodes, or next weekday nationally as standard. Same weekday deliveries outside of London postcodes carry a fee. International deliveries are also available.

About Pharmacieerge

Pharmacieerge creates seamless, secure e-Prescribing apps tailored for private practitioners, coupled with reliable dispensing and hand-delivery of medication to their national and international patients.

Pharmacieerge serves over 4,500 clinicians and their patients across all medical specialties from a 5,500ft² robotically enabled dispensary in the heart of London's Harley Street Medical Area.

Our e-Prescription platform WebPrescribe and mobile app mPrescribe[®] work either independently or compatibly with existing practice management software.
